### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

### **DETAILED ACTION**

Claims 1,4-9 and 13-15 are pending as amended 8/18/06

#### ***Drawings***

The replacement drawing of Figure 8 were received on 8/18/06. This drawing is acceptable.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by FR 2 803 534.

Please note that applicant has not submitted an English translation of this French reference. Rejection is based on the best assessment of the reference based on the drawings and the Examiner's limited knowledge of French.

The reference teaches a filter assembly having two "L" shaped housing members connectable together in head to tail fashion – see figure 2-5. The head portion of the members (3,10) form a collection chamber with inlets and outlets (2,11 and along 5A, etc), and wall portions (5,7) extending from the head portion (one wall with the head form the L shape); assembly of the two members together forms a plurality of recesses

Art Unit: 1723

(12) which hold the filter cassettes (13). The reference filter functions as intended by the claims language of claims 6-8.

The language "adapted to" repeated at several places in the claims would be only functional, and may not further limit the claims. Phrases such as "slidably receive" and "edge-wise" are repeated in at least claim 1, which create redundancy.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4,5 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR'534.

With respect to claims 13-15, the claims only recite multiple identical units "connectable thereto to ...", or "engagable", with out reciting any particular structure. The reference filter is capable of such function, even if the reference does not recite that multiple units are linked together.

Claims 4 and 5 recite using springs to mechanically assemble and separate the housing members/filter. Whether the reference teach this or not, such mechanism are known in the art, and would be within the capability of one of ordinary skill to design such mechanisms. Applicant has not recited any specific, unobvious mechanism that renders the claim patentable.

***Response to Arguments***

Applicant's arguments with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment and the submission of the new IDS necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
